Product Line Card

- Mini Mk8 MM - Modulating Burner-only Control
- Mk8 MM - Comprehensive Burner/Boiler Control
- Mk8 EGA Evo - Exhaust Gas Analyser
- Mk8 DTI - Data Transfer Interface - Complete Boiler Room Monitoring
- Colour Touch Screen on all units
- PC Download Manager software & IR Lead (available pre-installed on a pro laptop)

- Evolution* - copper-fined tube water boilers – up to 87% efficient - 500 - 3000 MBH
- Evolution Condensing - copper-fined tube with Stainless Steel secondary heat exchanger - 750 - 3000 MBH
- APEX - stainless steel condensing, up to 95% efficient - 425 - 825 MBH
- ARCTIC - stainless steel condensing, bent tube, up to 95% efficient - 1000 - 6000 MBH
- AMP* - stainless steel condensing with 5:1 turndown, up to 97% efficient - 1000 - 4000 MBH
- AMPW – dedicated stainless steel condensing with 10:1 turndown, up to 98% efficient – 400 - 1000 MBH

* Also available as dedicated Domestic Water Heaters

- MPC – 3-Pass cast iron, water - 500 - 3657 MBH
- V9 & V11 - cast iron, water or steam – 347 -1900 MBH and 667 – 4551 MBH respectively
- Series 3 - 3 pass packaged fire tube water or steam -wetback design – 1339 - 33476 MBH
- Series 4F – forced draft firebox, 15 PSI steam, or 30 – 60 PSI water – 528 – 25734 MBH
- Series 4N – hand fired, 15 PSI steam or 30 PSI water -
- Series C – 3 pass firetube construction, steam or water – 816 – 8165 MBH
- Series 8H (natural draft) - cast iron water boiler – 252 -550 MBH

- All Bryan boilers feature Bryan's exclusive Flexible Tube design, and are available in right or left tube access configuration
- AB Series – forced draft multi-pass design, water or steam – 900 – 3000 MBH
- RV Series – forced draft multi-pass design, water or steam – 3500 – 8000 MBH
- RW Series – forced draft multi-pass design, water or steam – 8500 – 21000 MBH
- Free Flex - stainless steel condensing, bent tube, up to 95% efficient - 1000 - 6000 MBH
- BFIT* - stainless steel condensing with 5:1 turndown, up to 97% efficient - 1000 - 4000 MBH

* Also available as Domestic Water Heaters

3091 Jarrow Avenue // Mississauga, ON // L4X 2C6

QUALITY IS ALWAYS THE BEST INVESTMENT

Specializing in Industrial and Commercial Boilers

- SG – Natural or LP gas only – 300 – 2,500 MBH
- JB – oil & gas, low NOx – 10 – 300 BHP
- HDRV – oil & gas, low NOx – 250 – 900 BHP
- JBS – oil & gas, low NOx, high turndown – 40 – 400 BHP
- HDS – oil & gas, low NOx, high turndown – 200 – 1500 BHP
- FDR – Forced Draft Register, multi-fuel, low NOx, high turndown

- Single or dual fuel models, including # 2 oil
- LP Series Turndown of 4:1 on gas and 3:1 on oil
- LC Series Turndown of up to 10:1
- Autoflame Combustion Control System comes standard
- Ultra Low NOx models available

- TOP-S - single stage commercial wet rotor pump cast iron or bronze body
- Star/Star S - single or 3 speed residential wet rotor pump cast iron or bronze body
- VeroLine-IPL - mechanically sealed dry rotor pump, single stage inline, heads up to 56' – flows up to 400 USGPM

- Engineered industrial and commercial venting - Stainless Steel AL 29-4C
- Category II, III & IV gas burning appliances
- Single and Double Wall in diameters from 3" to 24"
- Polypropylene Vent Systems with flu gas temperatures up to 230°F, and 100% recyclable

BOILER ACCESSORIES

- Communication Gateways & Sequencing Control Panels
- Steam Overflow Traps
- Feedwater Deaerators
- Steam Exhaust Heads
- Boiler Feed Systems
- Blowdown Tanks and Separators
